HOW WOULD YOU UTILIZE "GREEN" DESIGN WITHOUT SACRIFICING STYLE?

Conserve style with the use of responsibly managed wood products, low toxicity paints and finishing products, energy conserving plumbing and electrical devices and recycling solutions for building materials. There are wonderful-looking stone dust composite products and photo-perfect faux wood and tile products for cabinetry and flooring, in addition to the growing stable of renewable resource products like bamboo flooring. *Floor samples, Synergy Floor Covering, Denver, (303) 722-7161.*

HOW WOULD YOU UPDATE A TIRED LOOKING BEDROOM?

Get a fresh look with a new color scheme, new linens and freshly painted walls. Reupholster or slipcover furniture and replace your old lampshades. Add some new art, an area rug and a beautiful throw for the bed. Revarnish or repaint nightstands, crests and armoires. All of these are simple ways to revamp a tired space. *Throw, Hoff Miller, DDC, (303) 698-0800.*

WHAT ARE THE BEST WAYS TO DISPLAY COLLECTIONS?

Smaller objects can take on great presence when displayed in a group and in varied heights. Use wall brackets in a grouping on the wall to create art above a mantle or an entry piece. Tiny treasures also take on new life when stacked on top of interesting boxes or antique books. The top of an armoire is a perfect spot for larger pieces like globes, baskets or pottery, especially when a piece of artwork is hung behind them. *Antique mercury glass, personal collection.*
